

**KERRIN BASS**  
*QUALITY ASSURANCE*  
*SUPERVISOR*

**INTERVIEW**

Unit Dose Solutions (UDS)

**What led you to UDS and how long have you been here?**

I've always been interested in being in the pharmaceutical industry and after spending over 10 years in a retail pharmacy setting, I was exploring something new, different and challenging. The position opened at UDS and I've been here for over 5 & 1/2 years and love it!

**What has surprised you most about your time here at UDS?**

I was certainly surprised at the overall variability of the work. From small to large facilities that we service, we find ourselves performing Quality Control on very small, boutique-type orders to very large orders that may take days to complete.

## **What do you tell folks, that aren't in the business, that you do at UDS?**

I remind people that the medicines you see every day at retail pharmacy are very different in a hospital setting. The team I supervise ensures that all orders are accurate

to what our customers ordered. Ultimately, patients receive these meds and I want to ensure they get what is ordered.

## **What are your interests outside of UDS?**

I love to try new restaurants, exploring farmer's & flea markets, traveling and mostly spending time with family and friends!

## **What makes UDS special?**

The ability to learn new things and work in a challenging environment as well as knowing the company I work for provides a service that truly cares about patient safety.
